

WG 4: Career Development of Researchers

WG Leaders: Italy - ISSNAF
Germany - GAIN

Main objectives:

- What is it the individual science communities are already doing?
- What are synergies, commonalities or shared practices between them?
- What can we do to support, strengthen and build upon these practices?

Rationale/General questions:

- How do we provide career development?
- How do we identify needs in career development?
- How better support the careers of our young talents?
- What are the mobility schemes of other US Agencies?

Deliverables:

1. A format, which allows the various communities to share in each other's training and advising resources.
2. A good practice paper on career development and advising on career development
3. Create a sort of "Knowledge Center"

Action plan:

- Try to answer the general questions in a round table
- Formulate existing good-practice and ideal best-practice
- Identify needs (financial, logistical, etc.) required to achieve deliverable
- Formulate proposal for concrete implementation and required support.
